

Welcome to the SQL Crash Course Module

Welcome! This is the **optional SQL Crash Course**, and I'm glad you're here.

Whether you're **completely new to SQL** or just want a **quick refresher**, this module is designed to support your journey through **PL/SQL**.

Why This Module Matters

You're here to master **PL/SQL**—and that's the main goal.

However, having a solid understanding of **SQL fundamentals** will make a big difference in how quickly and effectively you learn PL/SQL.

Here's how this module helps:

If You're New to SQL

- You'll build a strong foundation from the ground up
- Concepts will feel clearer and less overwhelming later
- Learning PL/SQL will be significantly easier

If You Already Know SQL

- This serves as a fast refresher
- You may catch small details you missed before
- It helps align your SQL knowledge with PL/SQL usage

The Big Picture

Understanding SQL is like understanding how an engine works before driving a car.

You *can* drive without it—but you'll be a **much better driver** if you know what's happening under the hood.

A Quick Note About Course Completion 🎓

To receive your **PL/SQL course certificate**, the platform requires **all lessons to be marked as complete**—including optional modules like this one.

You have full flexibility in how you approach it:

Your Options

→ **Speed through it**

Play the videos at a faster speed if you already know the material.

→ **Mark as complete**

If you prefer to skip the content, simply mark each lesson as done.

→ **Cherry-pick topics**

Watch only what interests you—but remember to mark everything complete at the end.

Final Thoughts

The goal of this course is to help you become **confident and effective in PL/SQL**.

This SQL background is here to support you—not slow you down.

How you use this module is completely up to you.
